Australian wine in 2026 : a smaller crush, a pricier pour

Australia crushed 306,334 fewer tonnes of wine grapes in 2026, a fall of 19%. Yet each litre of wine sent overseas now earns 47% more than in 2015.

Where the grapes are grown

South Australia crushes 52% of Australia's wine grapes

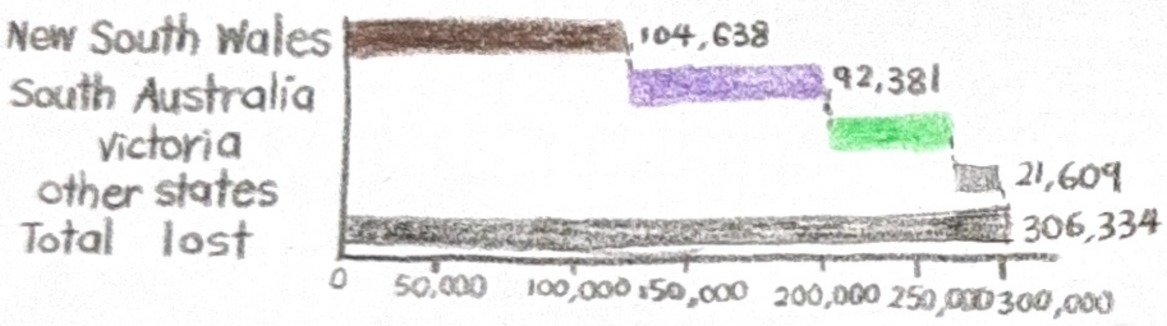

Share of the national grape crush, 2026.

There are 3 states crushed 97% of all wine grapes. South Australia alone crushed 658,087 tonnes.

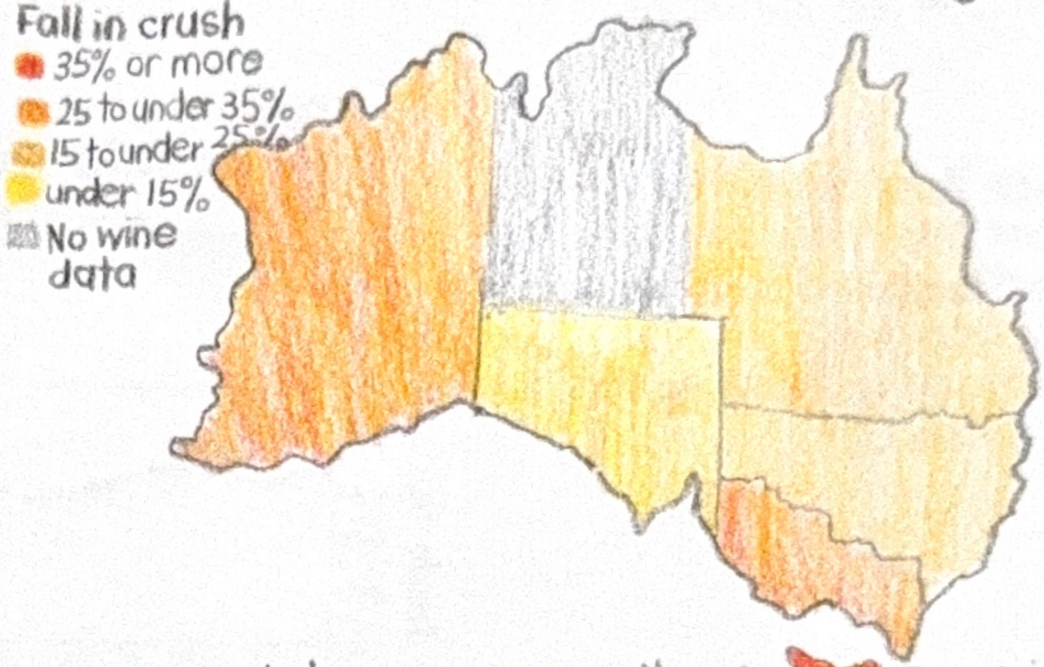

New South Wales, South Australia, and Victoria lost 93% of the 306,334 tonnes

other states : Western Australia, Tasmania, Queensland

Tasmania's crush fell hardest, down 40%

Fall in grape crush state, 2025 to 2026 vintage

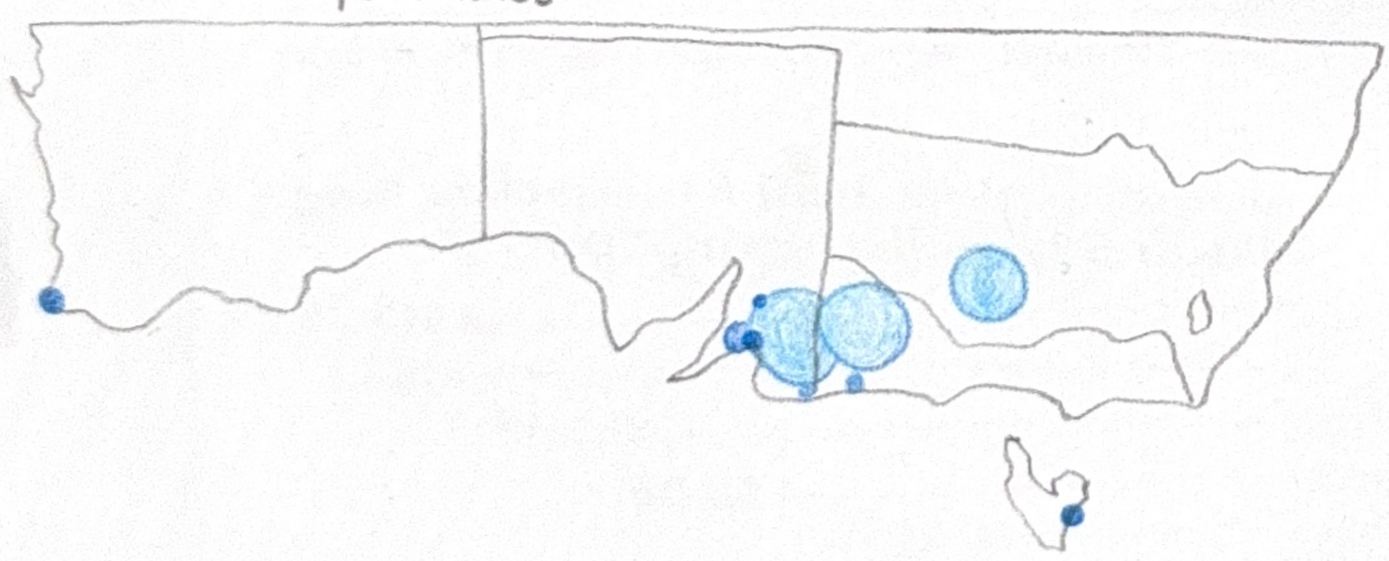

Every state crushed less than in 2015. Tasmania fell the most, by 40%, while South Australia fell only only 12%.

percentage hide scale. Tasmania fell the hardest, but lost only 7626 tonnes. New South Wales, South Australia and Victoria lost 284,725 tonnes between them.

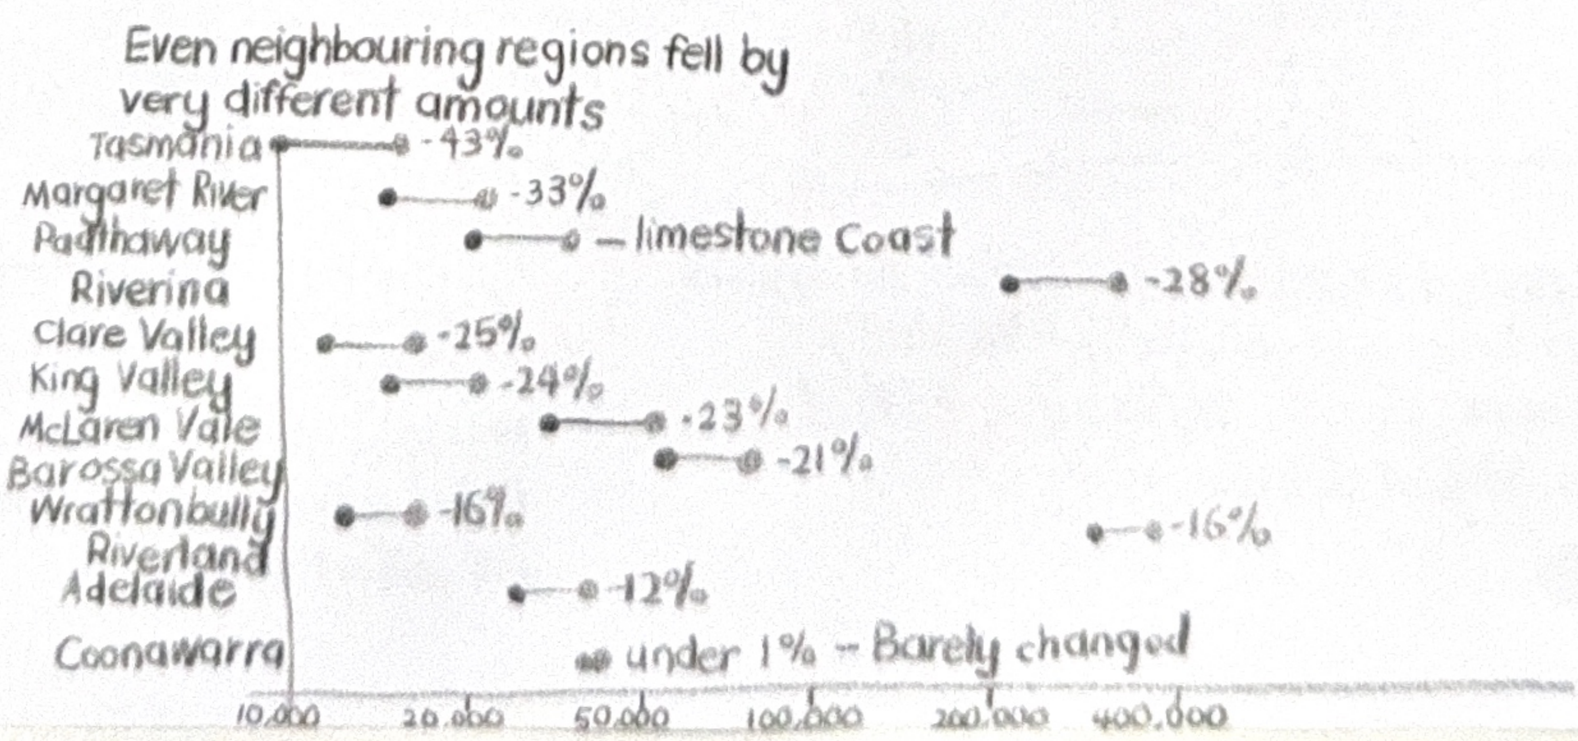

Region by region

Three warm inland regions crush most of the grapes, but earn the least per tonnes

Regions next to each other did not fall evenly. Padthaway crushed 28% less, while neighbouring Coonawarra barely changed, down under 1%. There is log scale means equal gaps show equal percentage falls, so small and large regions can be compared fairly.

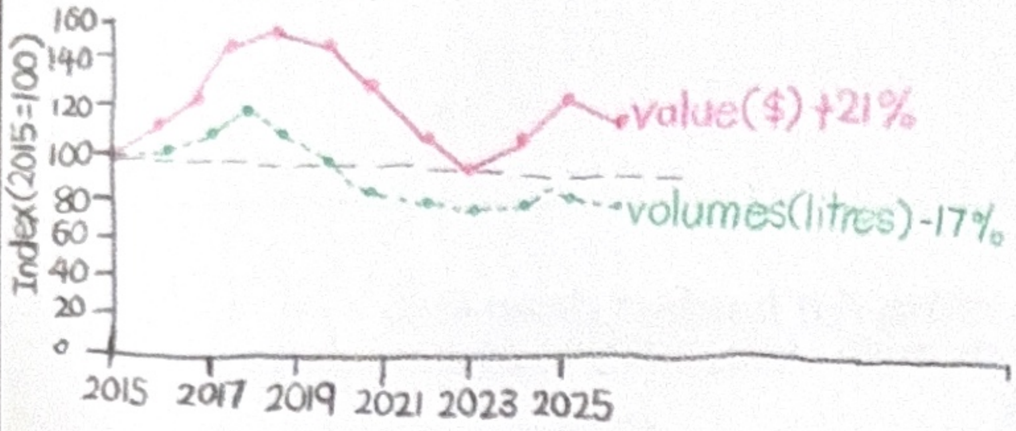

Even neighbouring regions fell by very different amounts

Less wine, more money

Since 2015, export litres fell 17% while export dollars rose 21%. Australia is selling less wine overseas.

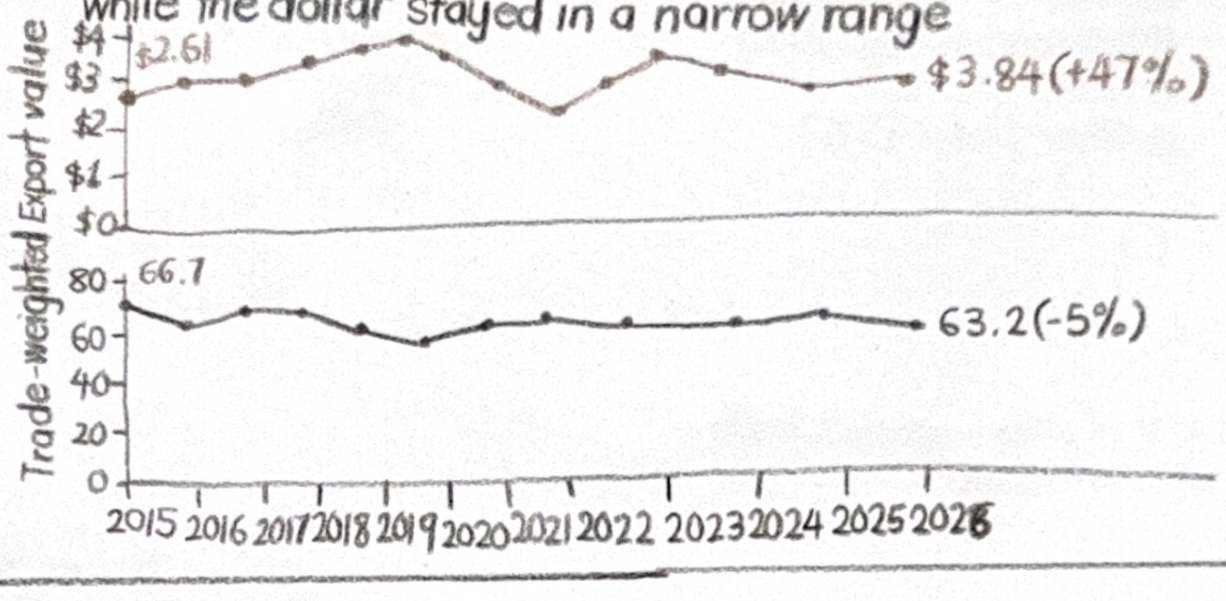

Since 2015, export litres fell 17% but dollars rose 21%

Both lines start at 100 in 2015, so each point shows the change since then. In 2019, China was Australia's largest wine market, worth $1.1 billion or 40% of all exports.

A weaker Australian dollar can make exports look more valuable. That is not what happened here. The export price rose from $2.61 to $3.84 a litre, while the trade weighted index stayed between 58 and 67.

Export prices rose 47% since 2015, while the dollar stayed in a narrow range

Where the wine goes

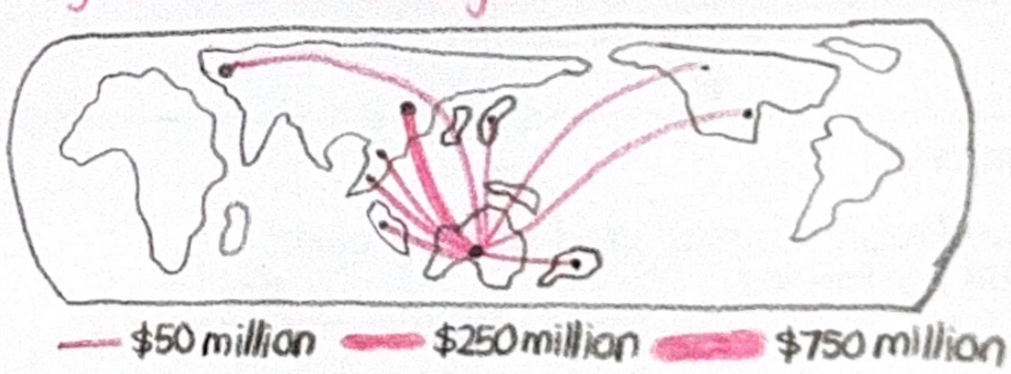

Across the 20 markets compared in this section, Europe takes about twice the litres of Asia, 253 million against 125 million. Asia pays almost 3 times the dollars.

Europe takes the most litres,
Asia brings in the most dollars

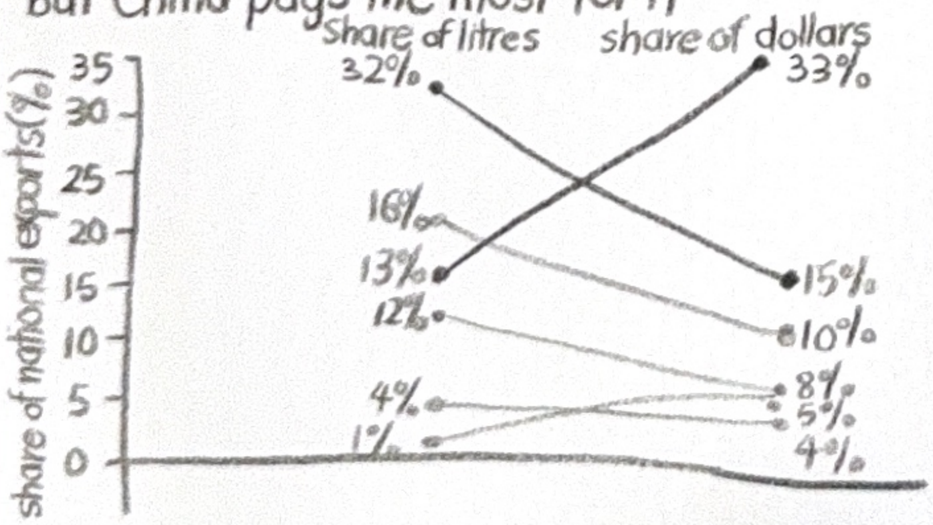

By litres: the 10 largest markets

By dollars: the 10 largest markets

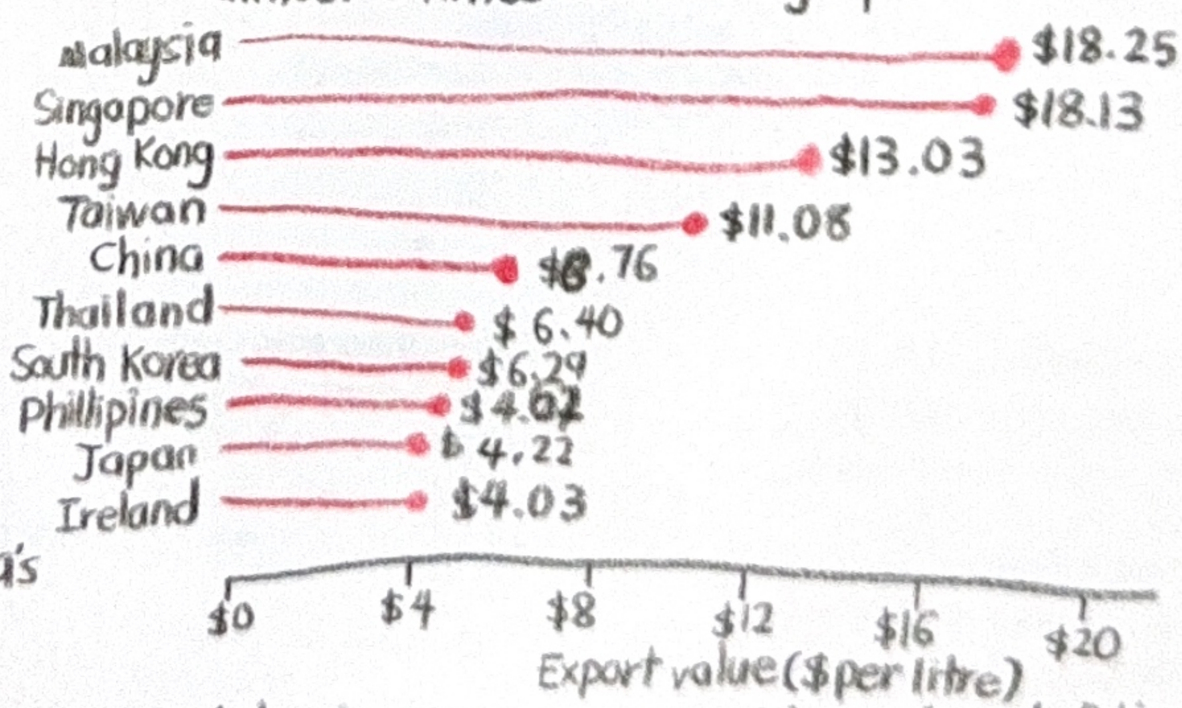

The United Kingdom takes the most wine, but China pays the most for it

The United Kingdom takes 32% of Australia's export litres but only 15% of the dollars. Mainland China is the reverse: 13% of litres, 33% of dollars.

Malaysia pays the most for Australian wine, almost 5 times the average per litre

Malaysia pays $18.25 a litre, almost 5 times the $3.84 average, and Singapore is close behind at $18.13.
